Deadline: **17th January 2021 till 11:00 pm**

Subject: **Web Lab 13**

Problem 01:

- Firstly, you import database (lab13) that are given with this exercise and carefully analyze the all tables of given database.
- Not need to create following layout. Only you create one select tag of “Select Class” in which has three options (figure 1). When you select “BITF14M” then AJAX request send to database and all student names of specific class has been retrieved and shown in table (figure 2).
